Recorded value summary

Currency	Selected purchase allocations	Current estimate totals	Items with each figure
USD	0.00 USD	80.00 USD	0 allocation · 1 estimate

Current estimate totals multiply each per-unit estimate by owned quantity. Loaned owned units remain included; borrowed items are excluded. Legacy record totals are included once and are not multiplied. The selected purchase allocation column sums only reviewed per-item allocations; shared purchase grand totals are listed separately below and are not assigned to every item.

Referenced purchase records

Merchant / date	Purchase total	Selected items	Selected allocation	Unallocated
Browser Camera Shop 2026-02-01	100.00 USD	1 of 1	Not allocated	100.00 USD

A shared purchase total appears once in this table, even when several selected items belong to it. It may include items outside this export. Legacy records without reviewed allocations are not split by the report.

Review notes

- 1 purchase record has no reviewed per-item allocation; no historical split was invented.
- No item photos are recorded for this selection.

Inventory items

No location recorded

Unit value camera 1794041878795-d6va1 · 2 units

No location recorded · Uncategorised · Good

Owned 2 · at home 1 · recorded on loan 1. Loaned units remain owned; the recorded home is a normal home, not a current physical location. Borrower names and loan notes are intentionally excluded.

Purchase total: Browser Camera Shop · 2026-02-01 · 100.00 USD transaction total · no reviewed per-item allocation · unallocated on this purchase 100.00 USD

Estimated current value: 40.00 USD per unit x 2 owned units = 80.00 USD total (household-supplied). Estimated 2026-11-07.

Package notes

• Only recorded facts were used. No missing price was replaced with zero and no missing date was invented.

• Purchase totals and current estimates are separate. Currencies are never added together or converted.

• Loaned units are still owned. Borrower names, loan notes, purchase notes and document notes are excluded from this package.

• Photos are the stored household photo derivatives; exact uploaded photo originals have already been normalized by Housetory.

• Original supporting document bytes are only claimed when the attachment bundle includes the original role. Normalized or cleaned scan PDFs are labelled as such in the bundle manifest.

• Per-item last-checked information comes from completed stocktakes and is shown only for exact recorded observations. A changed item is labelled rather than treated as still verified.

• This is supporting documentation, not an insurance policy, valuation, claim or guarantee of coverage.
